1. General description

This module adds voice control functionality to your shop. It allows the user to navigate your site using voice commands, and can also read product descriptions to the user. Commands are configurable from the administration panel, and the module can both recognize speech and read text in 79 languages. This module will also make your store more easily accessible by users with disabilities.

2. Module installation

Module installation follows the standard prestashop procedures; On the module list simply select the plugin and click install.

3. Module configuration

After installation the module appears on the „Installed module list“. Configuration is very simple and allows you to customize commands.

3.1 General settings

In the general settings panel you can set the basic options of the module.

Voice control is enabled

This option allows you to enable or disable the module.

Voice recognition language and reading language

This option allows you to select the language to be used with the voice recognition and reading plugin, from a choice of 79 languages. It is critical to set the desired language so that users can take full advantage of the module's capabilities.

3.2 Native commands

The module includes 15 native built in commands. In the next version we anticipate possibility of adding your own commands.

Native built-in commands are:

- **scroll down** - Command used to scroll down the page
- **scroll up** - command used to scroll up the page
- **cart** - it's used to navigate to the cart page
- **add to cart** - add product to cart
- **close** - close the modal box
- **order** - command used to navigate to the order page
- **back** - command works like browser „back” button
- **forward** - command works like browser „forward” button
- **find :what** - command used to search the products in your shop (for example „Find t-shirt” shows products that contains word „t-shirts” in the name)
- **prices drop** - after saying this command user will be moved to prices drop page
- **products** - while you are on the page that contain products grid - first product will be focused

- **next** - while one of the products in the grid is focused - it moves focus to the next one
- **previous** - while one of the products in the grid is focused - it moves focus to the next one
- **reset** - it resets focus on the products grid and scroll to the top of the page
- **show** - command is used to navigate to the selected products from product grid
- **homepage** - the command moves user to the homepage
- **read** - the command is used to read the description while user is on product page

4. Frontend features

After installing the module and enabling it in the configuration, small icon will appear at the right bottom corner of the page
